SOFTWARE FUNDAMENTALS 385

Partial List of Suppliers 385
Introduction 385
Process Control and Automation Software 385
Common Characteristic of Software 386
Software Tools 386
Operation of Software 387
  Software Execution 388
  Software Library 388
Software Architecture 388
  System Software 388
  Programming Software 388
  Application Software 388
Programming Languages 388
  High- and Low-Level Languages 389
  BASIC Language 389
  C Language 389
Software Standards, Quality, Licenses, and Patents 389
  Quality of Software and Reliability 389
  Software Licenses 389
  Software Patents 390
Software Design and Implementation 390
Software Development Tools 390
Bibliography 390

24
VIRTUAL PLANTS: PROCESS SIMULATION AND EMULATION 391

Introduction 391
Manufacturing System Engineering Process 391
Manufacturing System Simulation in Manufacturing System Design Phase 393
  Line System Design 395
  Transfer System Design 398
  Layout Design 399
Manufacturing System Emulation in Implementation Phase 401
  Case Study 402
Summary 404
Bibliography 405

25
VIRTUAL REALITY TOOLS FOR TESTING CONTROL ROOM CONCEPTS 406

Partial List of Suppliers 406
Introduction 406
Virtual Reality 406
VR Software Requirements for Design and Testing 407
Creating 3D Objects 407
  Using VR in the Control Room Design Process 408
New Control Room 409
  Refurbished Control Room 411
V&V of the Preliminary Design 411
Conclusion 413
References 413

MODEL-FREE ADAPTIVE CONTROL SOFTWARE 415

Introduction 415
Model-Free Adaptive Control 415

© 2012 by Béla Lipták

Definition of MFA Control 416
MFA Control Approach 417
MFA Advantages and Suitability 417
Single-Loop MFA Control Systems 417
Controller Architecture 418
SISO Control Algorithm 418
Adaptive Capability of MFA Control 419
MFA Control System Requirements 419
Multivariable MFA Control Systems 419
2-Input–2-Output MFA Control System 420
MFA Control Software Products 421
CyboCon MFA Control Software 421
SISO MFA Configuration in CyboCon 422
Nonlinear MFA Controller 423
Nonlinear MFA Configuration in CyboCon 423
MFA pH Controller 424
MFA pH Controller Configuration in CyboCon 424
Time-Varying MFA Controller 424
Anti-Delay MFA pH Controller 424
MFA XRT Controller and Configuration 425
MFA Control Toolset for LabVIEW Software 426
Feedforward MFA Controller and Configuration in LabVIEW 426
Anti-Delay MFA Controller in LabVIEW 428
Robust MFA Controller and Configuration in LabVIEW 428
3×3 MIMO MFA Controller in LabVIEW 429
MIMO MFA Controller Application Guide 430
MFA Control Toolbox for MATLAB® Software 431
MFA Control Applications 432
MFA for Ethylene Quench Water pH Control 432
MFA Control for Gas-Mixing Systems 434
MFA for Building Automation 434
MFA for Drilling Equipment Control 435
MFA Methodology: Combined Intelligence 435
Combined Intelligence Methodology 436
MFA Future Outlook 436
References 437

27
OPERATION OPTIMIZATION WITH SEQUENTIAL EMPIRICAL OPTIMIZATION AND SOFTWARE IMPLEMENTATION 438

Partial List of Software Suppliers 438
Introduction 438
Operation Optimization (Process Optimization) 439
Sequential Empirical Optimization 439
Nature of SEO Cycles 439
Mathematical Structure of SEO 440
Ideal Solution with Perfect Knowledge 441
Sequential Empirical Optimization 442
SEO Analytics 443
Application of SEO 444
Procedure 444
Example Applications 444
Conclusions 448
References 453

28
DATA HISTORIAN 454

Partial List of Suppliers 454
Introduction 454
Perspective View and Functions of Data Historian 454
Integration of Historian Activities and Examples 454
Conclusions 456
Bibliography 459
